

'Clouds' Mountain Gorilla Lodge comprises of 8 cottages, each built from volcanic stone, with two of these being double bed roomed family units. The main lodge building has a reception, dining room, a shop and a bar area, each is heated by an open fireplace to keep it a cozy area on the coolest mountain nights. The views from the lodge stretch across lush botanical gardens, to Rwanda and the Virungas, and on a clear night all the way to the glow of Nyiragongo Volcano in the Congo.

Each cottage has a butler service, day and night. From lighting the open fireplace to keep the room warm and cosy, to bringing tea and coffee for early risers, consider it done. The sitting area is furnished with soft sofas and armchairs, and walls are decorated with specially commissioned artwork. Your en suite bathroom has twin basins, and a walk-in shower with piping hot water to soothe tired bones after a day in the forest. At night you will sleep well under rich cotton sheets and a warm duvet.

The cottages private outside sitting areas are furnished with comfortable chairs and a personal, unobstructed and unforgettable view of the forest below, and the golden grasses of the Western Rift valley in the distance. Meals at 'Clouds' are a delight and are prepared using local ingredients to the highest standard. Afternoon tea is served in the lounge and in the evening meals are taken in front of a roaring fire in the dining area, or in the privacy of your own stone cottage.

'Clouds' Mountain Gorilla Lodge is situated at the trailhead for visiting the Nkuringo family of Gorillas. It was built as a partnership between The Uganda Safari Company/Wildplaces, and the Africa Wildlife Foundation, through the International Gorilla Conservation Program. The Nkuringo community directly benefit from the lodge, Visit 'Clouds' and experience the magic yourself.
